The Company was established on 12th October 2022 and is wholly owned by Acorn Green Group Limited. Constitutional documents of both the Company and its parent, Acorn Green Group Limited can be found attached at Appendix 1 to this IM.

The funds raised from the issue of the Redeemable Shares will be invested into the SPVs to be used as mezzanine funding to partly fund development costs on various projects. The remaining funding to complete the Scheme will come from RST Group Holdings Limited, an Acorn company, and senior debt funding. Constitutional documents of RST Group Holdings Limited together with its most recent financial statement for the period ending 30th September 2023 can be found attached at Appendix 2 to this IM.

THE MARKET AND THE COMPANY

Background

RST Group Holdings Limited will be providing a corporate guarantee ("**the Corporate Guarantee**") relating to the Capital Invested on this project. Acorn Property Group

Established in 1995, Acorn is an independent housebuilder and regeneration specialist. It has a long track record of successful award-winning developments throughout London, the South West of England and South Wales.

Acorn creates bespoke, design-led developments that enhance their immediate environment. Headquartered in London and with four offices in the South West and South Wales, Acorn uses its extensive local knowledge to find sites that can be sensitively developed to meet the needs of the local community, building sustainably wherever possible. Acorn uses in-house architects, interior designers, town planners, surveyors and construction managers who work with its brand, sales and marketing teams to make the most of every opportunity.

By working closely with landowners, investment funds, architects, local authorities and other public bodies, housing associations, introducers and charities, Acorn strengthens its local relationships to ensure the success of current and future developments. Driven by its commitment to repurposing existing buildings and its 'fabric-first' approach to new build homes, in mid-2021 Acorn launched Acorn Green, an initiative that puts sustainability at the heart of the design process.

Acorn builds using components and materials that deliver maximum performance benefits, always keeping ahead of current building regulations. By tailoring developments to meet local needs and taking time to find the right brownfield or greenfield opportunities, Acorn has a strong and diversified development pipeline.

Acorn is currently developing a broad range of residential, mixed-use and commercial sites in coastal, urban and rural locations with projects on brownfield and greenfield sites, featuring new build and conversions including listed buildings. Over the next three to five years Acorn estimates it will deliver over 1,700 homes with a total value in excess of £940m.

Awards

In recent years, Acorn has won numerous awards including:

Acorn's funding strategy

A typical example of funding

The funding requirements of each site are unique, but let's take as an example, a project costing £10m in total. Once complete, the expected Gross Development Value ("GDV") is £12m which would provide a £2m profit or 20% of GDV (an industry standard).

Standard bank funding:

In this example, the bank provides a loan, secured by a first charge on the property, for 65% of the GDV (£7,800,000) and is **first** to get its money back.

The bank receives a lower rate of return than the mezzanine funder, as it has a charge over the land and gets repaid first.

Mezzanine funding:

The gap between the funds lent by the bank and Acorn's investment (£1,200,000) is filled by mezzanine funding. Mezzanine funding is repaid after the bank loan.

The Developer's equity:

The Developer, Acorn, would invest the balance of any cash required (in this example £1,000,000) and would be **last** to be repaid. Their investment therefore carries the most risk.

Figures based on a scheme with a total cost of £10m and GDV of £12m which will provide Acorn a £2m profit.

Acorn's development strategy

Acorn is currently developing a broad range of residential, mixed-use and commercial sites in coastal, urban and rural locations with projects on brownfield and greenfield sites, featuring new-build and conversions including listed buildings.

Acorn looks at each scheme on its individual merits, starting from scratch each time, on every element of design. When Acorn purchases a site it balances a stringent risk analysis with the creative process to identify only profitable and deliverable schemes. Acorn sees the South West as the most positive region for investment, with excellent housing opportunities. These are driven by lifestyle changes, a growing population, improved transport links, excellent employment opportunities, good schools and beautiful landscapes and coastlands.

Although Acorn provides homes to all sectors of the community, Acorn's market is dominated by families, downsizers, and retirement buyers which are the most affluent and sustainable economic group of purchasers. Acorn has over 1,700 units in the existing development pipeline over the next 3-5 years.

Acorn has a number of key business principles and objectives for the short to medium term:

01. Continue to champion the cause of high-quality housing that benefits local communities.
There is a housing crisis in the UK that goes beyond a simple lack of housing stock. We need to address architectural principles and urban design theories to create housing that will meet future needs. Acorn understands that in order to reinforce the continuity of a neighbourhood's character and flavour, urban forms must be animated, and reflect the community's shared history and aspirations.
02. Develop our existing pipeline and expand our activities in the South West.
03. Maintain the diversity of our project pipeline to ensure our business is not overly reliant on any one target market or region, while continuing to build to the highest standards of design and sustainability. Our homes should be accessible to the widest possible range of buyers.
04. Continue to build the Acorn brand and to specialise in bespoke developments, thereby avoiding competition from larger housebuilders or small, local developers. Acorn will focus on projects of 20-100 units in medium- to high-value areas (£280- £1,000 per sq. ft.) which cater for identifiable, local demographic and economic needs.

The Construction

Excluding the cost of the land, construction represents the largest element of any development's cost. The construction process is also fraught with risk and opportunity and Acorn vigorously interrogates all elements of this.

Acorn undertakes extensive due diligence on all its contractors and sub-contractors. Acorn invests a huge amount of time ensuring the right construction procurement route is identified, whether it is direct construction, a fixed price design and build contract or a traditional open book tender process.

To obtain the best possible construction prices, Acorn operates a multiple stage tender process and carefully interrogates all prices to ensure that it obtains not only the best price, but realistic prices.

Acorn adopts the latest form of construction contracts, warranties and insurances. Furthermore, it employs only vetted professionals for each aspect of the process who at all times are monitored by Acorn's own experts to ensure best practice throughout.

A.H. Construction Solutions Group Limited

To avoid and mitigate construction risk, Acorn Property Group has a direct construction arm, headed by A.H. Construction Solutions Group Limited ("AHCS"). AHCS directly employs a wide range of construction professionals and undertakes a wide range of bespoke projects. With extensive construction experience across the South West, AHCS has a network of local contractors, professionals and suppliers. Their experience and technical expertise means they have a strong track record of delivering a wide range of projects from new-build apartments and houses to mixed-used schemes and the restoration and conversion of existing buildings.

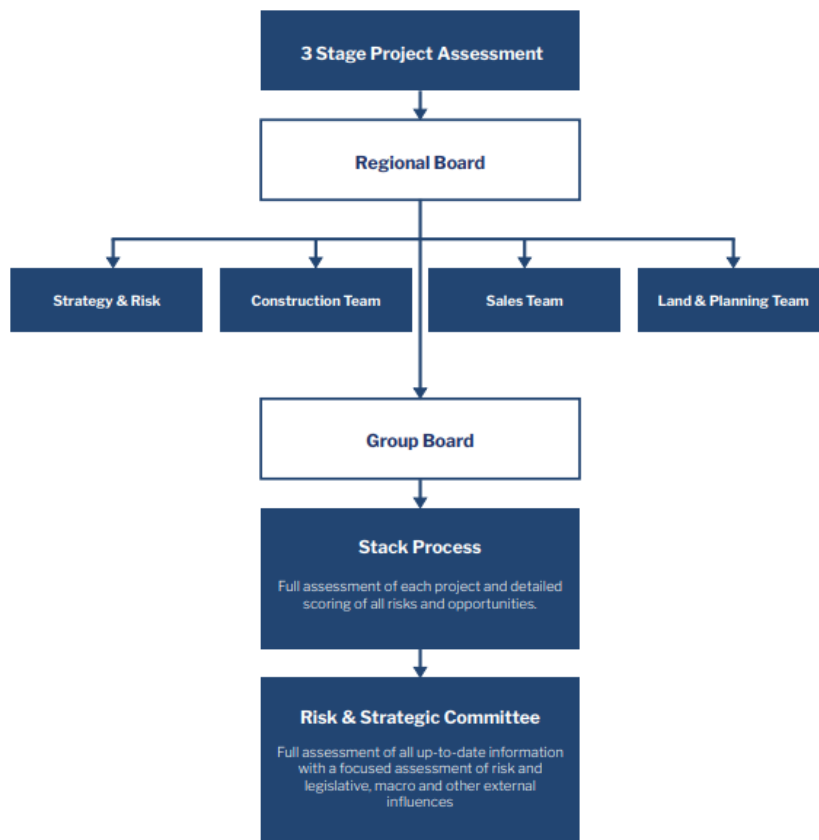

Due Diligence

Risk Management

Risk is the most important part of any development process. Acorn undertakes a robust assessment of all aspects of every scheme, consulting with both internal and external professionals. All schemes are initially looked at by the regional team who examine deliverability and planning risk, construction costs and values.

During this stage, there are a series of processes designed to identify all risks and opportunities. Once this process is complete, a detailed information pack is then passed to the Group Board and professional teams to assess all of the information provided. A further report is produced and once the scheme meets the appropriate criteria, it is approved.

Lastly, there is a third and final review prior to any purchase becoming unconditional. This involves a thorough re-examination of risk and ensures that the early assumptions made apply and that no legislative matters or other macro influences affect the decision to proceed.

Acorn Green

Acorn Green represents Acorn's unique, holistic approach to carbon reduction and its commitment to creating inspiring new communities which fulfil the current and future needs of its residents, while respecting and protecting the environment. Each Acorn development is individually and intelligently designed and built to the highest standard, ensuring that it makes a positive contribution to the local surroundings, creating an inclusive community where residents and nature can flourish long after Acorn's role in the development is complete. Acorn continually explores ways to move nearer to its zero-carbon goal. Acorn's construction teams are striving towards creating the Company's first zero-carbon homes, using further lower-carbon materials.

An Example of what our developments aim to include...

Running Costs.

We ensure lower running costs in a number of ways with the materials used within the construction of our homes, and by utilising 'off grid' renewable systems to heat or power some homes where possible. Acorn aim for at least a 92% rating across all sites with as many as possible being 95%.

Use of proceeds

Potentially Eligible Investors' Capital Invested will provide the Company with the part of the funding required to deliver various build projects being carried out by subsidiaries of the Company. The remaining funding will come from RST Group Holdings Limited, an Acorn company, and senior debt funding.

RISK FACTORS

The Directors believe that the factors described below represent the principal risks inherent in investing in the Company.

Prospective Potentially Eligible Investors should also read the detailed information set out elsewhere in this IM (including any documents incorporated by reference herein) and reach their own views prior to making any investment decision.

INVESTMENT RISKS

Loss of Investment

Subscribing for Redeemable Shares in a company, which will be unquoted and non-transferable involves a degree of risk. It may be difficult to obtain information on the current value of the Redeemable Shares and as there is no market for the Redeemable Shares it may be difficult for Potentially Eligible Investors to realise their investment.

Potentially Eligible Investors should note that there is no certainty that Potentially Eligible Investors will get back the full amount that they invest and may consequently lose some or all of the monies invested.

Past performance and the experience of the directors is no guide to future performance and hopes, assumed performance, aims, targets or plans. Financial illustrative returns or intentions contained in this document are no more than that and should not be construed as forecasts.

All figures quoted in this IM (including but not limited to build costs, the GDV and finance costs) are for illustrative purposes only as they are based on assumptions and projections and may increase and / or decrease depending on external factors over which the Company has no control.

The effect of inflation may have an impact on the real value of any guaranteed return.

In the event that the Company has insufficient funds to pay the Return and the Capital Invested on redemption then the Potentially Eligible Investors will, provided that they have taken all reasonable steps to enforce their entitlement to payment against the Company, be entitled to call upon the Corporate Guarantee and demand payment of the Capital Invested from RST Group Holdings Limited.

It should be borne in mind that the rights of all or any of the secured creditors of RST Group Holdings Limited at the date of the demand will take priority over the claims of Potentially Eligible Investors under the Corporate Guarantee.

Potentially Eligible Investors are accordingly advised to consult an investment advisor who is authorised under the Financial Services and Markets Act 2000 and specialises in investments of this kind, before making their decision to invest.

Force Majeure

Both the Company and the developments may be subject to a “force majeure” event. This is typically an event totally outside of the control of the Company and includes, but is not limited to, an act of God, fire, flood, earthquakes, a pandemic, act of any sovereign including but not limited to war, invasion, civil war or rebellion, acts of terrorism or imposition of government sanctions or embargoes.

A force majeure event would delay (in some circumstances significantly) or prevent full completion of the developments as envisaged.

Illiquidity

The Redeemable Shares in the company are highly illiquid and there is no market for their sale. The Potentially Eligible Investors' rights to a Return and repayment of the Capital Invested are limited to those rights set out in this IM.

Dilution

The Company does not warrant that it will not issue further Redeemable Shares in the future on the same or different terms to the terms set out in this IM.

However, the Company confirms that should it issue further Redeemable Shares the right of the existing Redeemable Shareholders to the Return will be maintained.

Trading Activities

The Company, like all businesses, is vulnerable to financial difficulties and volatile economic conditions and investing in Redeemable Shares may involve significant risk.

There is no guarantee that the Company's strategy or trading activities will be successful. The returns from the trading activities undertaken will inevitably vary from the target financial returns set out in this IM.

There is no certainty Potentially Eligible Investors will get back the full amount that they invest and may consequently lose some or all of the monies invested.

Legislation, Tax & Jurisdiction Risk

There is a risk that the government makes changes to existing laws or regulations or creates new laws or regulations that can have an adverse effect on financial instruments, for example laws regarding capital transfers across borders. In addition, Companies operate within the legislation that govern their trading activities. Any legislative changes could have an effect on the Company's profitability.

Exit Route

Although the Company has stated a potential exit route for Potentially Eligible Investors to realise their investment, there is no guarantee that any of this route will be undertaken.

There is no certainty that Potentially Eligible Investors will get back the full amount that they invest and may consequently lose some or all of the monies invested.

No Right to Participate in Management or Profits beyond the Agreed Return

The Redeemable Share shareholders do not have any right to participate in management of the Company. As such the Redeemable Share shareholders will not be in a position to object to particular strategies or decisions of the Company's directors.

Financial Services Compensation Scheme

The protections afforded by the Financial Services and Markets Act 2000 including recourse to the Financial Ombudsman Service and compensation entitlements under the Financial Services Compensation Scheme do not apply.

All Potentially Eligible Investors are strongly recommended to seek advice on the suitability of this investment.

RISKS RELATING TO THE BUSINESS AND OPERATIONS OF THE COMPANY

Personnel

The Company is dependent on the expertise and continued service of employees, consultants and advisers with the necessary skills that the Company requires. The directors believe that the future success of the Company will depend in part upon its ability to compete in the highly competitive property development industry. The Company is therefore dependent on the expertise and continued service of certain key executives and highly qualified personnel. The departure of any of the Company's executive officers or other key employees, consultants and advisers could have a negative impact on its operations. In the event that future departures of employees, consultants and advisers with these key skills occur, the Company's ability to execute its business strategy successfully or to continue to develop its business operations could be adversely affected.

Regulatory Risk

Changes to existing laws or regulations or the creation of new laws or regulations may have an adverse effect on the Company's business, financial condition or operating results.

Property Market Risks

Fluctuations in the property market could affect the value of the developments and all related costs and returns related to the successful completion of the developments.

Any negative fluctuations in the property market could affect the performance of the Company.

OTHER RISKS APPLICABLE TO THE COMPANY

Economic Risks

Global market risks and economic conditions and any force majeure type events could adversely affect the Company's business and operations. The Company may be affected by general market trends, which are unrelated to the performance of the Company itself.

Market opportunities targeted by the Company may change and this could lead to an adverse effect upon its revenue and earnings. Any economic downturn either globally or locally in any area in which the Company operates may have an adverse effect on the demand for the Company's developments.

Marketing

The Company will engage marketing and wealth management companies to undertake the marketing and advertising of the Redeemable Shares. Commissions for these services will be paid directly out of the proceeds of the Redeemable Share issue. The Company estimates commission payable to be no more than 20% of the proceeds raised from the issue of the Redeemable Shares.

This figure has been reached by discussing the necessary level of marketing, understanding of the complexity of the investment and the time taken to market to the appropriate investors. The directors have confirmed this level of commission has been catered for in the financial plan of the Company and should not affect the viability of the projects.

Return

Under the terms of the offer contained in this IM Potentially Eligible Investors are entitled to a Return of 7%-8% per annum on the Capital Invested depending on the type of investment chosen payable either quarterly or on the Redemption Date or on the date of Early Completion.

There can be no assurance that at the date when payment is due the Company will have sufficient funds, taking into account its liabilities, to enable payment to be made.

FORWARD-LOOKING STATEMENTS

Certain information contained in this IM constitutes "forward-looking statements," which can be identified by the use of forward-looking terminology such as "assumed", "example", "illustrative", "may", "will", "should", "expect", "intend", "anticipate", "project", "estimate", "plan", "seek", "continue", "target", or "believe", or the negatives thereof or other variations thereof or comparable terminology, and include projected or targeted minimum returns to be made by the Company.

Such forward-looking statements are inherently subject to material, economic, market and other risks and uncertainties, including the risk factors set out in the 'Summary' and 'Risk Factors' sections of this document and, accordingly, actual events or results or the actual performance of the Company may differ materially from those reflected or contemplated in such forward-looking statements.

In addition, Potentially Eligible Investors should not place undue reliance on "forward-looking statements", which speak only as of the date of this invitation document.

The investment offered in this IM may not be suitable for all recipients of the document. As the Redeemable Shares in the Company are unlisted/unquoted on a stock exchange, it will be difficult to obtain valuation information and information regarding the extent of the risk involved. There are often greater risks involved in unquoted shares than quoted shares/securities. The value of the Redeemable Shares can go down as well as up and this could result in a Potentially Eligible Investor incurring a total loss of their investment.

TAXATION

The following statements are intended to apply only as a general guide to certain UK tax considerations in relation to the Redeemable Shares. They are based on current UK tax law and what is understood to be the current published practice of HM Revenue and Customs (“**HMRC**”) (which may not be binding on HMRC), both of which are subject to change at any time, possibly with retrospective effect. They relate only to certain limited aspects of the UK taxation treatment of, and are intended to apply only to Potentially Eligible Investors who are resident, and, in the case of individuals, domiciled or deemed domiciled, solely in the United Kingdom for UK tax purposes (except where the position of non-UK resident or non-UK domiciled Potentially Eligible Investors is referred to expressly) and do not apply to Potentially Eligible Investors to whom split-year treatment applies. They apply only to Potentially Eligible Investors who hold the Redeemable Shares as investments (other than under an individual savings account or a self-invested personal pension) and who are the absolute beneficial owners of both the Redeemable Shares and any dividends paid on them.

The statements may not apply to certain classes of shareholder such as (but not limited to) trustees, persons acquiring the Redeemable Shares in connection with an office or employment, persons holding their shares through trust arrangements, dealers in securities, banks, insurance companies and collective investment schemes. Prospective holders of the Redeemable Shares who may be subject to tax in a jurisdiction other than the United Kingdom or who may be unsure as to their UK tax position should seek their own professional advice. The returns quoted in this Information Memorandum are Gross and will be subject to the deduction of Corporation Tax at the prevailing rate.

1. PAYMENTS (SUBJECT TO ANY FURTHER HMRC LEGISLATIVE CHANGES OR TAX GUIDANCE)

Withholding Tax

The Company will not be required to deduct or withhold amounts on account of UK tax at source from dividend payments, irrespective of the residence or particular circumstances of the Potentially Eligible Investor receiving such dividend payment.

Investments made by Companies

Potentially Eligible Company Investors within the charge to UK corporation tax that are “small companies” for the purposes of Chapter 2 of Part 9A of the Corporation Tax Act 2009 will not be subject to UK corporation tax on any dividend received from the Company provided certain conditions are met (including an anti-avoidance condition).

Potentially Eligible Investors within the charge to UK corporation tax that are not “small companies” for this purpose will not be subject to UK corporation tax on any dividend received from the Company so long as the dividend falls within an exempt class and certain conditions are met. For example, (i) dividends paid on shares that are not redeemable and do not carry any present or future preferential rights to dividends or to the Company’s assets on its winding up, and (ii) dividends paid to a person holding less than a 10 per cent. interest in the Company, should generally fall within an exempt class. However, the exemptions mentioned above are not comprehensive and are subject to anti-avoidance rules.

If the conditions for exemption are not met or cease to be satisfied, or such a Potentially Eligible Investor elects for an otherwise exempt dividend to be taxable, the Potentially Eligible Investor will be subject to UK corporation tax on dividends received from the Company, at the rate of corporation tax applicable to that Potentially Eligible Investor **Investments made by Individuals**

A nil rate of income tax will apply for the first £500 of dividend income received by individual Potentially Eligible Investors in a tax year (the “**Nil Rate Band**”).

The rate of tax applicable to dividend income in excess of the Nil Rate Band will depend on the wider tax position of the Potentially Eligible Investor. Broadly speaking, after taking into account the amount (if any) of a Potentially Eligible Investor’s personal allowance, and any other allowances, exemptions and reliefs, the Potentially Eligible Investor’s taxable income up to the basic rate limit will fall within the basic rate band; taxable income between the basic rate limit and the higher rate limit will fall within the higher rate band; and taxable income above the higher rate limit will fall within the additional rate band.

For the tax year running 6 April 2024 to 5 April 2025 the basic rate limit is £37,700 and the higher rate limit is £125,140 (although, these limits can be increased in certain circumstances).

The rates of income tax on dividends received above the Nil Rate Band are (a) 8.75 per cent. for dividends in the basic rate band; (b) 33.75 per cent. for dividends in the higher rate band; and (c) 39.35 per cent for dividends in the additional rate band.

In determining the tax band in which any dividend income over the Nil Rate Bands falls, dividend income is treated as the top slice of a Potentially Eligible Investor’s income and dividend income within the Nil Rate Band is still taken into account. Because dividend income (including income within the Nil Rate Band) is taken into account in assessing whether a Potentially Eligible Investor’s overall income is above the higher or additional rate limits, the receipt of such income may also affect the amount of personal allowances to which the Potentially Eligible Investor is entitled.

2. INHERITANCE TAX

The Redeemable Shares will be assets situated in the UK for the purposes of UK inheritance tax.

Accordingly, regardless of whether a Potentially Eligible Investor is resident, domiciled or deemed domiciled in the UK for tax purposes, (i) the deemed transfer of Redeemable Shares on the death of the Potentially Eligible Investor under the UK inheritance tax rules or (ii) a lifetime disposition (which may include a gift, transfer at less than full market value, settlement or deemed transfer) of the Redeemable Shares, may give rise to a liability to UK inheritance tax. The applicable rate of inheritance tax depends on the circumstances of the Potentially Eligible Investor and of the disposition and can be up to 40 per cent.

Various exemptions and reliefs may be available depending on the circumstances of the Potentially Eligible Investor and of the disposition. In particular, no inheritance tax liability should generally arise for a Potentially Eligible Investor who is not domiciled or deemed domiciled in the UK unless the cumulative aggregate value of their UK assets has exceeded the inheritance tax nil rate band (currently £325,000). A non-UK domiciled Potentially Eligible Investor who is unsure as to whether a disposition may be within the scope of UK inheritance tax or where there is potential for a double charge to UK inheritance tax and an equivalent tax in another country is recommended to seek professional advice.

4. STAMP DUTY AND STAMP DUTY RESERVE TAX

The allocation and issue of the Redeemable Shares will not give rise to a liability to stamp duty or stamp duty reserve tax.

QUESTIONS AND ANSWERS

WHAT ARE REDEEMABLE SHARES?

A Redeemable Share is a share which entitles the holder to a fixed return. Companies often issue Redeemable Shares for specific projects or specific capital raises. Acorn Portfolio Investments Limited has issued Redeemable Shares specifically to raise funds as mentioned in this document.

WHO CAN INVEST?

Any individual who is over the age of 18, or a trust, company, the retail sector or charity that is not prevented by the laws of its governing jurisdiction from applying for or holding the Redeemable Shares and who also falls within one of the following categories:

- (i) certified high net worth investors (as per FinProm article 48);
- (ii) certified sophisticated investors (as per FinProm article 50); or
- (iii) self-certified sophisticated investors (as per FinProm article 50A).

We recommend all investors speak to an advisor who is authorised under the Financial Services and Markets Act 2000 and specialises in investments of this kind.

IS THIS A REGULATED PRODUCT?

No. Neither the Company nor the Redeemable Shares are regulated. Accordingly, this is a higher risk investment than alternative regulated products.

WHEN DO I GET MY ORIGINAL INVESTMENT BACK?

All of your original investment is expected to be returned in full on the relevant Investment Anniversary or on the Ultimate Redemption Date.

CAN I INCLUDE THIS INVESTMENT AS PART OF MY SIPP OR SSAS?

You may be able to hold your Redeemable Shares in a SIPP and SSAS wrapper provided your pension provider is willing to accept non-standard assets such as unlisted securities. Potentially Eligible Investors must check with their pension provider first and should not assume the Redeemable Shares will be SIPP or SSAS-eligible.

CAN I INVEST THROUGH A COMPANY AND ARE JOINT APPLICATIONS ALLOWABLE?

Yes, corporate investments or joint applications can be accepted.

CAN I SELL OR GIVE MY INVESTMENT TO SOMEONE ELSE?

No, the Redeemable Shares are non-transferable. Potentially Eligible Investors should consider carefully whether an investment in the Redeemable Shares is right for them in light of their personal financial circumstances as they will not be able to sell the Redeemable Shares and receive their capital back until the relevant Investment Anniversary or the Ultimate Redemption Date.

IF I DIE WHAT WOULD HAPPEN TO MY INVESTMENT?

Under these circumstances, the Redeemable Shares would form part of your estate and title to them would be held by the executors or administrators of your estate. Your executors or administrators would hold the Redeemable Shares until their redemption or, if the Company agreed in writing, the Redeemable Shares may be redeemed and the cash value would become part of your estate. If applicable, the redemption process might take some time depending on the specific circumstances around your estate.

WHAT TAX IS PAYABLE ON MY INVESTMENT?

We do not offer tax advice. However, it is our understanding that the Redeemable Shares paid as a dividend that would be taxed at the Potentially Eligible Investor's marginal dividend rate. Therefore any return paid to individuals will be subject to Corporation Tax at the prevalent rate at the time for an individual and for a company no tax will be due unless funds are distributed out the company. For all information about tax, we recommend all Investors speak to an independent specialised tax advisor who is authorised and specialises in investments of this kind.

SHOULD I DISCUSS THIS INVESTMENT OPPORTUNITY WITH A FINANCIAL ADVISOR?

We recommend all Potentially Eligible Investors speak to an advisor who is authorised under the Financial Services and Markets Act 2000 and specialises in investments of this kind.
